PROFESSIONAL SUMMARY

IT professional with 5+ years of experience spanning healthcare enterprise technology, technical support, IT operations, and GRC. Combine hands on technical troubleshooting with experience in cybersecurity risk assessments, ITGC testing, SOX 404, SOC 2 compliance, and IT governance. Experienced in bridging technical and business teams to resolve complex issues, lead implementations, improve processes, and translate technical, security, and compliance requirements into practical solutions.

CORE SKILLS

IT Operations, Technical Project Management, Systems Administration, Identity and Access Management (IAM), IT Risk & Compliance, Artificial Intelligence (Claude AI, ChatGPT AI), Application Support, Technical Troubleshooting, Incident Management, SOX 404, SOC 2 Type II, Logical Access, Change Management, SQL, Software Implementation, Virtual Environments, Microsoft 365, Excel, PowerPoint, Power BI, ServiceNow, Zendesk, SumoLogic, Jira, Citrix, Epic, Workiva, Slack, Zoom, MS Teams.

PROFESSIONAL EXPERIENCE

Technical Support Engineer | uPerform | Elkridge, MD

September 2021 – Present

- Led 10 software implementations with newly signed healthcare clients with a 94% on time deployment, modernizing client workflows and reducing operational risk.
- Resolved 400+ Tier 2/3 escalations across SSO, cloud services, user access, software and server performance while maintaining a 99% CSAT score.
- Utilized custom SQL queries and Sumo Logic log searches to investigate system anomalies, utilizing Power BI dashboards to track root-cause trends and reduce recurring software incidents
- Partnered with key client stakeholders and Engineering to deliver over 23 enhancements and resolve over 15 self-identified recurring software defects.

IT Risk Consultant | Clearview Group | Owings Mills, MD

July 2022 – July 2024

- Drove fieldwork for IT governance engagements assessing controls against NIST SP 800-53 and ISO 27001 requirements to identify compliance gaps and mitigate risk.
- Spearheaded SOC 1/SOC 2 readiness engagements and ITGC testing across 20+ applications, evaluating 100+ controls to remediate key deficiencies prior to final audit.
- Facilitated walkthroughs with Process Owners to map application workflows, document IT Application Controls, and mitigate critical operational risks prior to audit testing.

EDUCATION

Bachelor of Science in Computer Information Systems | Stevenson University 2017 – 2020

CERTIFICATIONS

CompTIA Security + | In Progress

Certified Information System Auditor (CISA) | In Progress
